BEACON SYSTEM

All runners benefit from this beacon. In particular, it allows those around the sailors who are not on site to be able to follow them from a distance. It is also useful to coaches for their debriefing.

The essential + of this beacon is that a racer has replay access to all the regattas in which he has previously participated if he was equipped with this system. Finally, waterproof and floating, it has enough autonomy for the whole regatta, because the supplier, Metasail, switches them on and off remotely.
